NOTE:

After installing the entire system correctly, you need to perform Auto Stroke Learning before you start using it. For more information about Auto Stroke Learning operation guide, please refer to control box product data sheet, which can be downloaded from the Moteck website.

● **Operation**

1. Touch and hold button ∧ , the actuator is extending, i.e. table is moving up.
2. Touch and hold button ∨ , the actuator is retracting, i.e. table is moving down.
3. Touch and hold each button 1 , 2 or 3 , table will move to the memorized position accordingly and stop automatically.

● **Memory Setting**

1. Touch button S for 2 seconds until screen flashes. Followed by touching button 1 , then screen will show 𝟶𝟶𝟷 ; Release the button and the height read-out will be shown on screen and memorized as position 1.
2. The operation for memorize positions 2 and 3 is similar to the one for position 1.
3. When the screen flashes after touching button S for 2 seconds, if button 1 through 3 is not pressed within 20 seconds, the screen will stop flashing and leave the memory setting mode.

● **Error Code**

About error code information and recommended disposition, please refer to control box product data sheet, which can be downloaded from the Moteck website.
