Operating Guide

TXC remote control functions and operation instructions

● **RF Pairing**

After the RF receiver product enters the pairing mode (the operation mode is determined by the receiver product), press any key of the hand controller (except the LED torch button) to perform pairing. After confirming that the pairing is successful according to the LED operation indicator of the receiver product, and then the actuator can follow the button action of the remote control.

LED torch
(White)

Torch button

● **LED torch**

The LED torch button only controls the torch on/off. Press and hold the button to light up, and release the button to turn off; this button function is independent and has nothing to do with other remote control operation functions, and the button backlight cannot be activated.

● **RF2.4GHz channel switching function**

This device might be interfered by some other devices with same frequency (2.4 GHz; eg. WIFI router or WIFI hub).

If so, please move any port of the dip switch in the battery compartment to change channel and pair the remote control with the adapter one more time.
